

ProtonVPN

For Firestick, follow the link below, for other devices, simply search ProtonVPN via your app store. <https://protonvpn.com/support/firestick/>

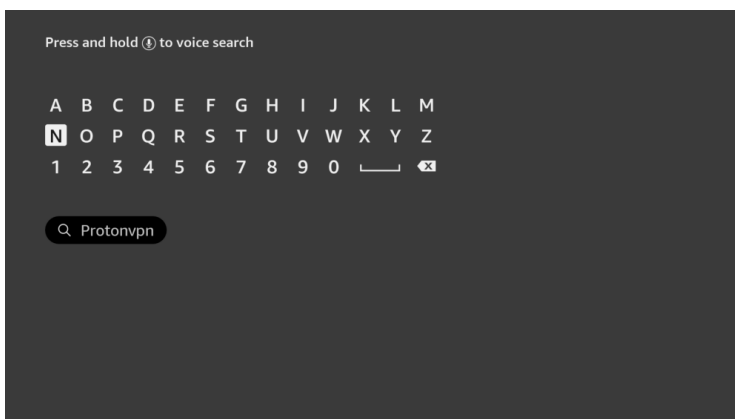

How to install Proton VPN on Amazon Fire TV

1. You can press the microphone button on your remote control to perform a voice search for ProtonVPN, but in our tests, this method proved unreliable.

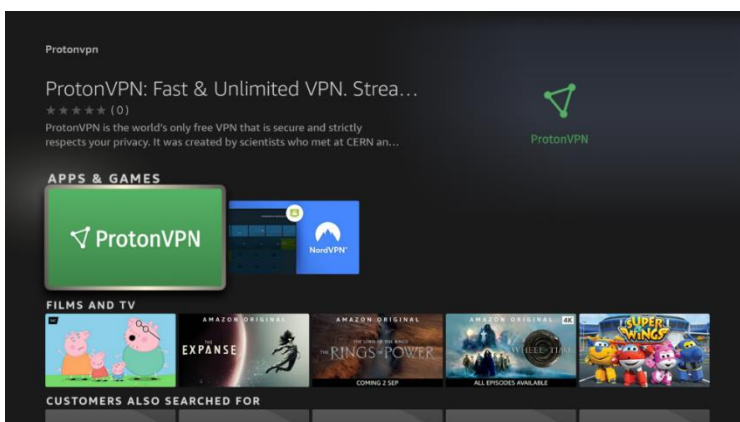

Alternatively, go to Find → Search....

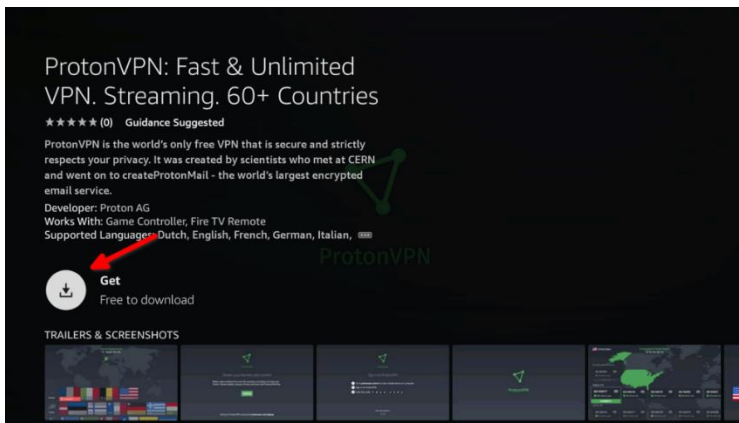

And look for protonvpn.

2. Select the Proton VPN app from the search results.

3. Select the Get icon to download and install the app.

4. Run the app and Sign in using the instructions provided. (link: <https://account.protonvpn.com/tv>)

5. Connect to a Proton VPN server to start using our service on your Amazon Fire TV device.
